- **Libraries & Frameworks:** Tailwind CSS, React.js, Redux, Express.js, Mongoose
- **Databases:** MongoDB, MySQL
- **Platforms & Services:** GitHub, Docker, Vercel, Render, Resend

PROJECTS

Video-App (using Express.js, MongoDB, Mongoose)

- Video-App is a web-based platform inspired by YouTube, where users can upload videos, manage channels, view watch history, and subscribe to other users.
- The backend is developed using Node.js and Express, following industry standards with custom error classes, password encryption, and JWT-based authentication.
- MongoDB with Mongoose ODM is used for data management, leveraging advanced aggregation pipelines for efficient queries such as fetching user watch history and subscription details.

Notes-App (using React.js & Redux Toolkit)

- A streamlined, React-based note-taking application leveraging Redux Toolkit for efficient state management.
- Powered by Vite for ultra-fast development, the app supports full CRUD operations and search functionality, wrapped in a clean, maintainable code structure.

Quiz-App (using React.js)

- An interactive quiz application that captures the user's name, tracks selected answers, validates correctness, and displays a personalized final score/result.
- Implemented with React Router for smooth navigation and hooks for state management across components.
